FARM LAND VALUES ARE INCREASING

[Republican A. P. Leased Wire]
WASHINGTON, April 8.—Farm land values are increasing by leaps and bounds.

Figures made public today by the department of agriculture show that values for the United States, taken as a whole, increased 25.7 per cent in the last four years, and 11.5 per cent last year. The figures are based upon reports from the department's field agents. The value of farm lands without improvements is estimated at \$45.50 per acre, compared with \$46.55 a year ago, \$40.31 two years ago, \$38.10 three years ago and \$36.23 four years ago.

Increases have been general with one or two notable exceptions in the northwest. The exceptional increases of last year are attributed to the reaction in the south following last year's temporary depression and to the stimulus of war prices, particularly of grain.

The percentage of increase in the far western states was eleven.

HE GOT HIS MAN AND—THE LAUGH

The portly night chief of the Go Fetchem Squad
Got a busy-up call from the Ghost of M. Quod.
And not being on to the merry old wag,
He pumped off in mad quest of a guy on a jag.

He grazed the high places to Grand Avenue
And there sure enough lay the soak in full view.
And he rounded him up all according to laws,
M. Quod's hand-contrived April Fool drunk of straw.

Long may the blithe spirit of merry M. Quod
Float over his bodily home in the sod.
To cheer the lorn traveler on life's rugged road
Where harrying sorrows indigenous brood.

FINANCES and MARKETS

[Republican A. P. Leased Wire]

NEW YORK, April 8. (Wall Street).—Pressure was directed against the more prominent stocks at the outset of today's brief session, such issues as United States Steel and the better known rails declining to lowest prices of the week. These losses were largely, if not wholly, retrieved before the close when a spirited demand for metals, especially the zinc shares brought about a general reversal.

American Zinc, the most active feature of the day, made a new high record on its advance of points to 85 1/2, and Butte and Superior, a stock of the same class, rose 3 to 25. Other active features again included the machine, which followed the irregular trend, Crucible Steel, Coppers, such as Anaconda, Shattuck, Arizona and Tennessee, the motors, International Nickel and United States Industrial Alcohol.

Alcohol was the most erratic of all stocks, with an extreme loss of 2 points on steady offerings. Short covering in that issue effected half its loss. A few inactive specialties like hide and leather preferred, American Lined preferred and Sears Roebuck were lower at intervals by 1 to 3 points.

Rails were again a negligible quantity.

Total sales of stocks amounted to 255,000.

Exchange on Paris fell to the new low rate of 92.

The week's various financial undertakings probably accounted for an actual loan expansion of almost \$20,000,000.

Today's bond market was steady, with total sales par value of \$1,550,000.

United States issues were variably higher and lower on call during the week.

CHICAGO GRAIN.—Uneasiness over the relations of Germany and the United States caused the wheat market today to undergo material declines which were only removed in part by rumors that Germany would disavow the sinking of the Sussex.

Prices closed unsettled, 13 to 18 1/2 c. per bushel, with May at \$1.16 1/2, July at \$1.14 1/2, Corn lost 3/4 c. to 1/2 c. and oats, 1/2 c. to 1/4 c. cent.

In provision the outcome varied from 10 cents decline to a rise of 5 cents.

Dealings were begun in the wheat pit soon after the opening, largely of liquidation by holders, including one of the most prominent of the bull speculators.

Corn was depressed by the weakness of wheat, oats sagged with other grain. Provisions averaged lower, influenced somewhat by the setback in the value of cereals. Packers were said to be expecting normal receipts of hogs during the next three weeks.

Close: Corn, May, 75c; July, 76 1/2 c. Oats, May, 44 1/2 c; July, 43 1/2 c.

NEW YORK COTTON.—NEW YORK, April 8.—Spot cotton, steady; middling uplands, 11.25. Sales none.

FARMING DIFFERENT IN STATE OF ARIZONA

We are in the habit of saying here in Arizona that our farming is peculiar and different from that in other parts of the country. To a certain degree this is true, but fundamentally farming in this state does not differ from that elsewhere. When we get right down to brass tacks we find that the staple agricultural products in Arizona are grain, potatoes, cotton, hay, and cattle and hogs, as they are in other states. But many settlers have come to Arizona with the idea that there was something about this state which would enable them to get rich quick in farming. With this one object in view they are constantly trying one crop or one kind of livestock after another, always finding in the end that it would not make them a fortune. The fact of the matter is that this getting rich quick in farming is as elusive and deceptive as is the pot of gold at the end of the rainbow.

There is just one way to make money farming in Arizona, that is, to secure the advice of competent experts in working out a conservative adapted plan of agricultural development for the various sections of the state, and for all the farmers in those sections to become a part of those plans and stick to them until results are secured. In the end this method, coupled with successful farmer's organizations, will lead to farming prosperity.

COMB SAGE TEA IN LIFELESS, GRAY HAIR

Look Young! Common Garden Sage and Sulphur Darks So Naturally No One Can Tell

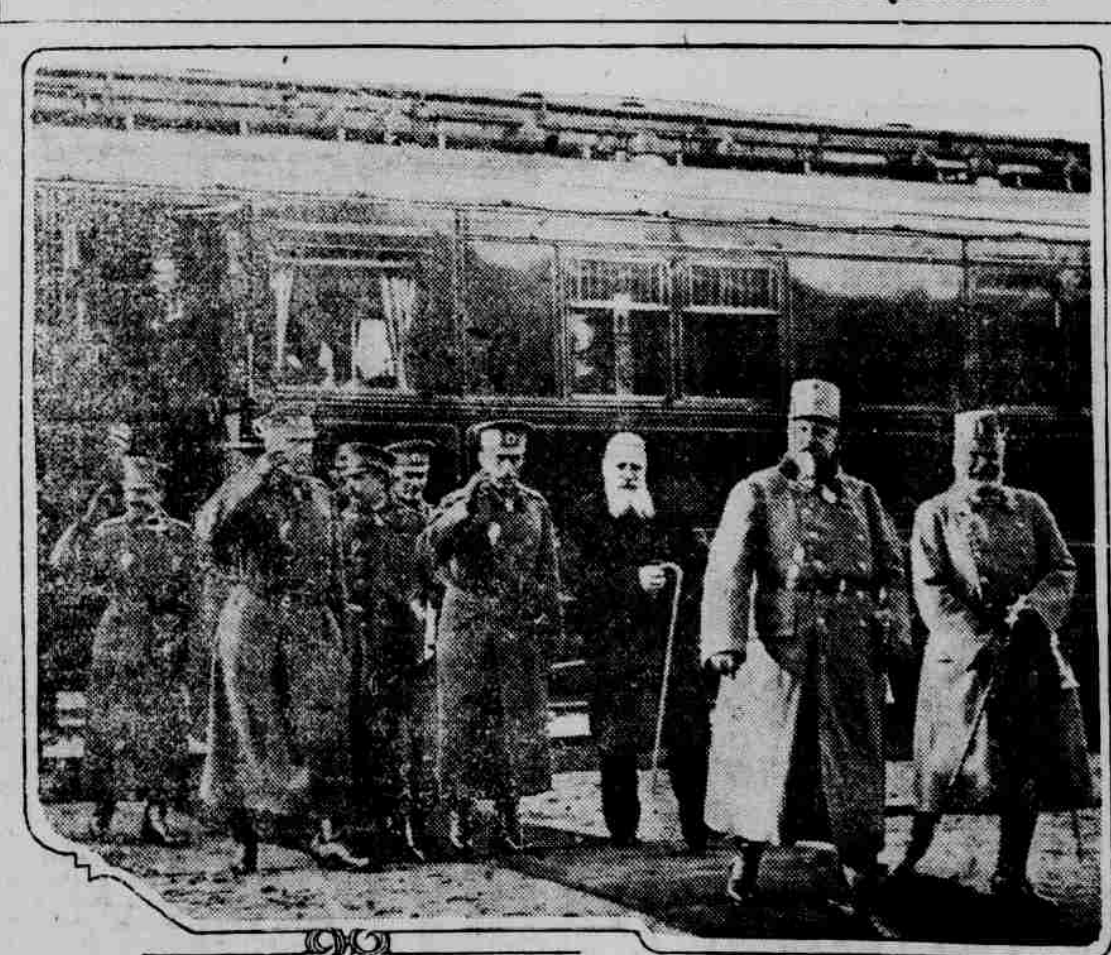

Grandmother kept her hair beautifully darkened, glossy and abundant with a brew of Sage Tea and Sulphur. Whenever her hair fell out or took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect. By asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this old-time recipe, ready to use, for about 50 cents. This simple mixture can be depended upon to restore natural color and beauty to the hair and is splendid for dandruff, dry, itchy scalp and falling hair.

A well-known down town druggist says everybody uses Wyeth's Sage and Sulphur, because it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use, too. You simply dampen a comb or soft brush and draw it through your hair, taking a strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and abundant.
